

Dear Peninsular Park Subdivision Resident,

Paving construction within the Peninsular Park Subdivision will begin the week of August 10th and will continue through October 24th. A planned construction phase map is included with this information for your reference. Weather and other factors may change the planned schedule slightly from what is shown.

The project is funded through a Special Assessment District that was initiated by the residents of Peninsular Park and has subsequently been approved by Commerce Township and West Bloomfield Township. The project is being managed through Commerce Township and their engineering consultant, Giffels Webster.

The contractor performing the work is Asphalt Specialists, Inc. from Pontiac, MI. They have successfully completed many paving projects in Commerce Township. We will have a testing engineer and an inspector on site to make sure all work is installed properly and in accordance with the approved construction plans.

During this time of disturbance, access will be maintained to all residences, but please be prepared for delays and times at which that access may be limited temporarily. Also, help visitors and people attempting to make deliveries by making them aware of the construction. The contractor will make every effort to communicate the construction sequence with the residents. We do ask that residents keep all cars off the street in the area of construction. Any vehicles that are parked in the current area of construction may need to be towed at the owner's expense if they are not able to be moved.

This notice along, along with additional information related to the costs and a detailed description of the project is available on the Commerce Township website and can be printed for re-use.

Part of the contract is to restore all disturbed areas and that will be done immediately following construction.

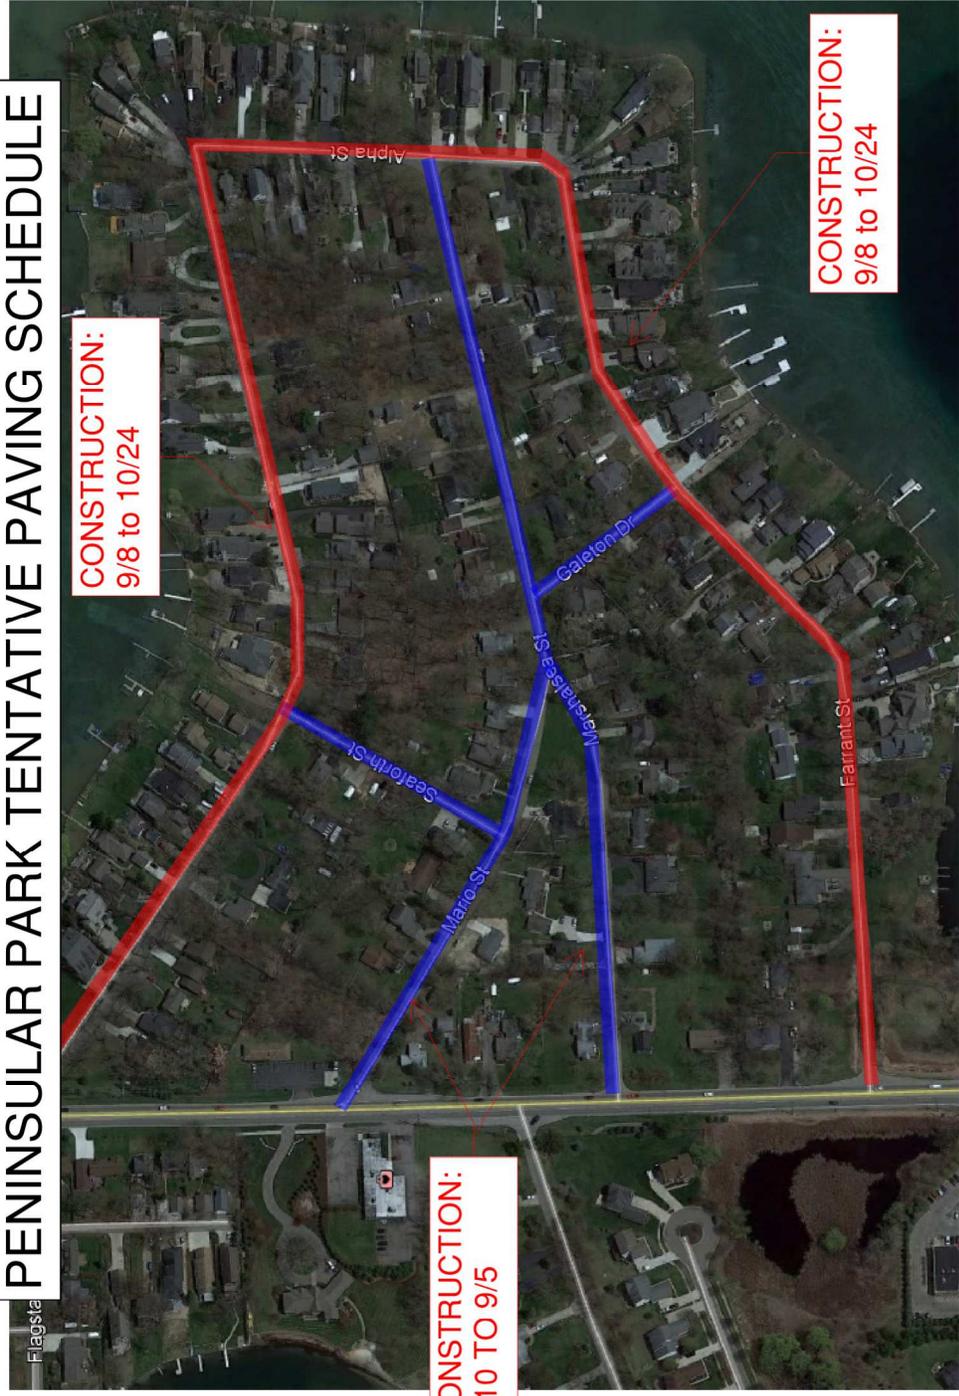

Please feel free to contact me with any questions or concerns on my cell phone at (248) 980-4694 or email sstanley@giffelswebster.com for any anything related to this construction project.

Alternately, please feel free to contact Jason Mayer at (248) 202-8803 or jmayer@giffelswebster.com.

Sincerely,

Scott Stanley
Lead Engineer
Giffels Webster
