

Fats, Oils, and Greases

They gum up the works!

Fats, oils, and greases (FOG) wreak havoc on our wastewater systems. When FOGs are rinsed down the drain (even when using a garbage disposal), they build up and harden, causing sewer pipes to clog. Keep our water flowing by properly disposing of FOGs.

Properly dispose of fats, oils, and greases (FOG)

Put FOG in covered containers and cans for proper disposal. Wipe down pots and pans with a towel to remove any FOG. Scrape food and scraps into the trash when possible.

Keep it fresh. Keep it flowing.

“Flushable” Wipes?

They clog our pipes

Things like “flushable” wipes, feminine hygiene products, and paper towels do not disintegrate like toilet paper. This means they cause blockages in sewer pipes. Keep our wastewater system flowing and dispose of these items in the trash.

To keep it flowing, only flush:
