

Hello LSLPC Members,

I talked with Oakland Harvesters around lunch time today. They will be done tomorrow and removing all equipment tomorrow. They have worked all the original map areas and additionally harvested in 2 other areas that Dr. Pullman and I observed as ready for harvesting on Tuesday afternoon.

Oakland Harvesters will make a review of the lake tomorrow before leaving - the purpose will be to gather weeds that have escaped the harvesting machines and floated onto our shorelines. If you have excess weeds, please pile them at the end of your docks for pickups, if you have the ability. This floater issue is one of the drawbacks of harvesting and it is unavoidable.

This gathering of the floaters and placing at the end of the docks is something that we will need to review and discuss later this summer. I am out of town until Tuesday afternoon, so I will not be able to personally observe the process for the floaters.

I have discussed petitions with Pine Cove Villas and Shores of Baypointe - they have completed their petitions and will turn them into me on Tuesday when I return. Please let me know your status - Lakeside, Homestead Shores, Mapledale and North Shores.

Also, a reminder for the Wednesday - June 1 meeting at the Township Offices at 7pm.

I am reachable by email and mobile phone until coming home on Tuesday.

Thanks, John
